

# Kitchen Food Paper Prototype

Sarah J. Bruno

- \*Some kitchen food that is “cuttable”.
- \*Each item has pieces that are made to look like they are in the shape of a common way to cut them.
- \*The kitchen food should represent shapes for the kids to learn.
- \*The final product will have textures added to them to stimulate the real feel of the food.

# Peach

Opens up to reveal a seed inside.  
All pieces are able to come apart.

# Strawberry

Stem does not separate  
from leaves.

# Avocado

# Avocado

Halves open up to reveal  
a seed inside.

Leaf does not separate from  
top of carrot.  
All other pieces are able to  
come apart.

Carrot

# Knife

Will not be sharp, but will be thinner than this, so it can “slice” the food.
