

# Food Fun

Kid's Toy; Choppable Kitchen Food

Sarah J. Bruno

# Initial Concepts

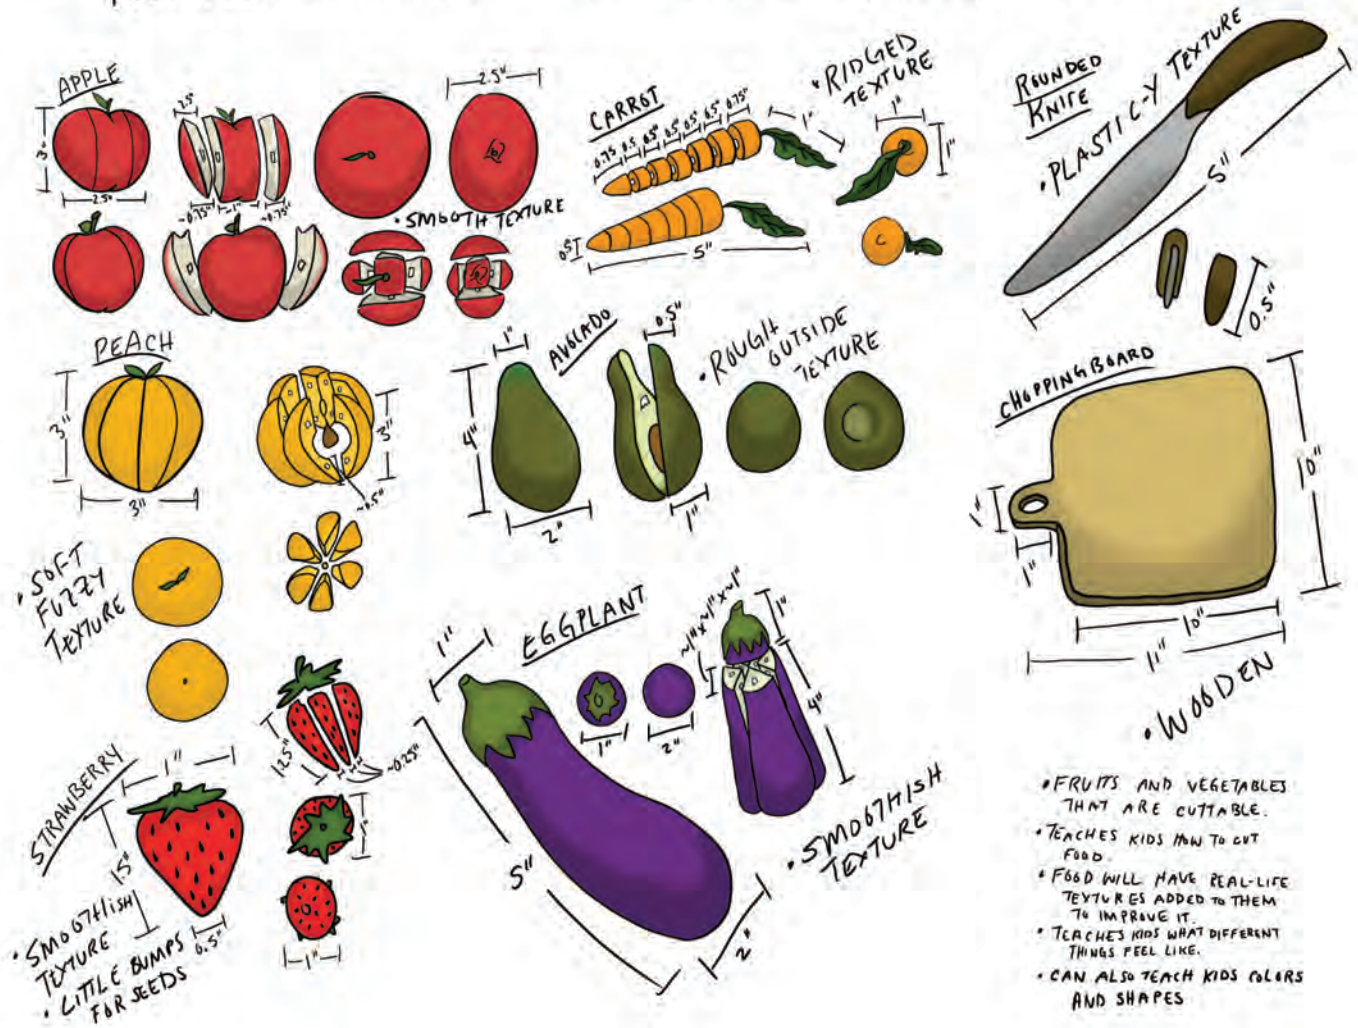

The initial concepts of creating the toy. I picked 5 ideas of the 20 that I came up with, which I would have liked to continue forward with.

## Refined Sketches

REFINED SKETCHES - PROTOTYPING - PROJECT 3 - SARAH J. BRUNO

The refined sketches of the toy I decided to create. This shows color choices, food choices, dimensions, and different views of the different sides of the products. It also contains notes in the bottom that explains what is in the future for the product.

# Paper Prototype

The paper prototype of the product. They are true to size from the dimensions in the refined sketches. They are created out of cardboard and show the how the prototypes work, the functionality and structure of the products.

# Final Concept/Prototype

Side View

The final concept prototype of the product. It is at half scale and is created from a 3D printer and modeling clay. It was painted to be as close to the the color of the actual fruit colors and shaped to be as close to the actual fruit shapes. There is some add texture to the peach to give it a fuzzy feel as a real peach is, and the strawberry has the seeds to give it a slightly bumpy feel. They are connected by magnets.
